University Project

Jot Bikes – Rental Management System **Mar 2025 – Jun 2025**
Kent Institute, Sydney

Objective: To automate rental and sales operations for an e-bike retailer through a Business Process Automation (BPA) system.
Tools: Developed using HTML5, CSS3, JavaScript, and MongoDB, managed via GitHub

Duties:
- Designed the UI/ UX framework by translating business requirements into logical wireframes for Admin, User and Vendor modules.
- Collaborated in a team environment to ensure data accuracy and system reliability.
- Ensured system accessibility and responsiveness.
- Planned content flow to improve user engagement and conversion.

Outcome:
- Delivered a functional, secure system that automated inventory tracking and rental agreements.
- Authored the Software Requirements Specification (SRS) Report and presented the final solution to stakeholders.

Result: Obtained a High Distinction

Employment History

Nail Artist **Apr 2023 - Present**

USA Nail Bellevue Hill, Sydney

- Delivering personalized consultations by gathering client requirements, analyzing their needs, and proposing customized solutions to improve overall user experience.
- Efficiently managing a tight appointment schedule to meet daily service targets and business deadlines
- Thriving in fast-paced settings, managing client expectations while maintaining a clean and organized workstation within 30 to 45 minutes
- Supporting a team of 15 by maintaining high service standards and contributing to smooth operations during peak hours periods, assisting in managing up to 20 customers at a time
- Strictly following sanitization and infection control protocols to ensure a safe, high-standard environment

Crew Trainer **Apr 2017 – Jan 2022**

McDonald's, Sydney

- Spearheaded the onboarding and technical training for new team members to ensure 100% compliance with operational system procedures
- Coordinated floor activities with a team of 5 during peak periods to consistently meet strict time-based service targets and business goals
- Facilitated real-time problem solving and conflict resolution to maintain a collaborative and productive work environment
- Monitored real-time production workflows to ensure all outputs met best-practice standards and quality benchmarks, supporting daily product revenue of approximately $10,000
- Maintained precise and up-to-date training checklists and compliance documentation prior to launching new product promotions, ensuring audit readiness and consistent quality standards

Personal Attributes

- Strengthened attention to detail and precision through over 2 years of delivering meticulous nail enhancement services and maintaining rigorous hygiene and sanitization standards in a high-pressure environment.
- Honed analytical problem-solving and collaboration skills by translating business requirements into a functional UI/UX framework and MongDB database for a rental system.
- Developed time management and organizational skills by managing a busy schedule of part time job while successfully completing a Bachelor of Information Technology.
- Sharpened technical training and mentoring skills by leading the onboarding of new staff and translating complex operation system procedures into actionable training steps.

Hobbies and Interests

Meditation to calm and reflect myself and clear my mind (if needed) before bed or in the morning
